

A Very Bad Paper for DeskReject Guard

Dr. Jane Rao, John Doe
Department of CSE, Example University
jane.rao@example-univ.edu

Abstract

This is the abstract of the paper.

1 Introduction

In our previous work [3], we introduced a novel method.
Our code is available at <https://github.com/rao-lab/deskproject>.
We evaluate on the dataset.
As shown in Figure 2, the architecture is complex.
Then, Figure 1 shows the data.
See Figure 7 for an overview.
Table ?? shows the results.

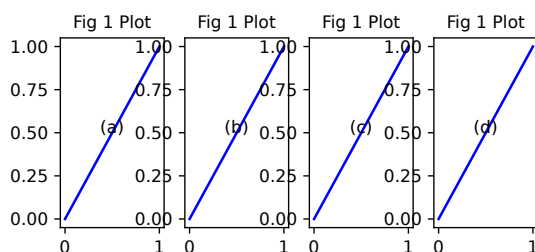

Figure 1. Data distributions. (a) Train set. (b) Validation set. (c) Test set.

2 Method

System Architecture

Figure 2. System architecture.

EXAMPLE UNIVERSITY, Robotics Lab

Figure 3. System diagram.

3 Results

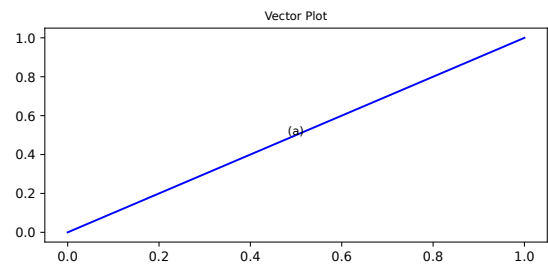

Figure 4. Vector plot.

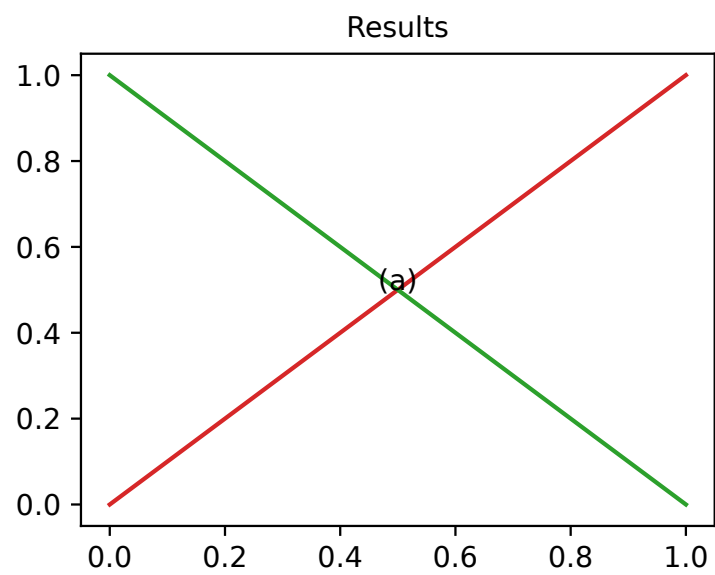

Figure 5. Results using line plot.

Table 1. Dataset stats.

4 Conclusion

We conclude the paper here.

Acknowledgements

We thank the EXAMPLE UNIVERSITY Robotics Lab for funding.

Ethics Statement

This research was approved by the IRB.
